

TAJDID ALAM

PROFESSIONAL SUMMARY

As a Senior Full-Stack Developer with over 6 years in the tech industry, my career has been a journey of continuous growth and diverse technological explorations. My expertise spans a wide array of technologies, including React.js, Angular, Node.js, C#/.NET, and TypeScript, enabling me to craft end-to-end software solutions.

I approach development with a keen eye for detail, ensuring every line of code is both functional and maintainable. My style is deeply collaborative, thriving in environments where knowledge sharing and teamwork are paramount. Agile methodologies and iterative development are central to my work ethos, helping me deliver high-quality software efficiently.

Problem-solving is at the heart of my professional persona, driving me to tackle challenges head-on and find innovative solutions. I am committed to lifelong learning, constantly updating my skills to stay abreast of the latest technological advancements. My goal is to contribute to projects that not only demand technical expertise but also make a meaningful impact.

WORK HISTORY

Sr. Full-Stack Developer (React, Node, TypeScript), 10/2022 - 10/2023

H20k Innovations, Palmdale, CA

- Developed comprehensive frontend and backend systems, balancing functionality and design, using React for dynamic user interfaces and Node.js for efficient server-side operations.
- Focused on crafting visually appealing and user-friendly websites, ensuring optimal user experience and seamless site navigation.
- Implemented well-designed, testable, and efficient code by adhering to the best software development practices, with a strong emphasis on TypeScript for improved code reliability and maintainability.
- Integrated data seamlessly from various back-end services and databases, utilizing advanced features of Node.js and React for efficient data handling.
- Collaborated effectively with team members using tools like Slack, Jira, Notion, and GitHub, ensuring smooth workflow and consistent project progress.

SKILLS

- React.js / Next.js
- Angular / AngularJS
- Node.js
- C# / .NET / ASP.NET
- TypeScript
- Tailwind CSS / Material-UI
- Docker
- GraphQL
- HTML5 / CSS3 / Javascript
- MongoDB / PostgreSQL
- Microsoft SQL Server
- AWS / GCP / Azure

**Sr. Web Developer (React, Angular, Node, C#/.NET),
08/2019 - 10/2022**

Robert Half, Palmdale, CA

- Expertise in a Diverse Tech Stack for SaaS, Healthcare, Medical, Real Estate, and Retail industries, including advanced proficiency in React, Next.js, Angular, Node.js, TypeScript, C#/.NET, and ASP.NET.
- Developed Dynamic Web Applications using React and Next.js, focusing on creating responsive and user-friendly interfaces.
- Leveraged Angular to build interactive client-side applications, enhancing user experience and engagement.
- Implemented Robust Server-Side Solutions with Node.js and C#/.NET, optimizing for performance and scalability in high-load environments.
- Applied ASP.NET for efficient, server-side web application development, integrating seamlessly with frontend frameworks.
- Managed and Designed Databases using PostgreSQL, MongoDB, and Microsoft SQL Server, ensuring reliable and effective data storage and retrieval.
- Deployed Applications on AWS and Azure, focusing on secure, scalable, and efficient cloud solutions.
- Utilized TypeScript across projects for improved code reliability and maintenance.
- Collaborated Across Teams, contributing to a range of projects in various sectors, and demonstrating versatility in adapting to industry-specific software development needs.

**Software Developer (Angular, ASP.NET),
07/2018 - 08/2019**

Bravado, Palmdale, CA

- Developed and optimized web applications using Angular, enhancing user interface functionality and design to create engaging and efficient user experiences.
- Contributed to backend development with C#, .NET, ASP.NET Core, Entity framework building reliable and scalable server-side applications that support complex business logic.
- Facilitated Integration between Angular-driven frontend and ASP.NET backend, ensuring seamless data flow and system coherence.
- Participated in database management, using Microsoft SQL Server to maintain and optimize data storage and retrieval within .NET framework.
- Engaged in collaborative development, working within a team to align technical solutions with business needs, while adhering to project timelines and quality standards.
- Applied industry best practices in coding and software design, focusing on creating maintainable, secure, and high-performance software.

EDUCATION

San Francisco State University - San Francisco, CA
Bachelor of Science, Computer Science

Antelope Valley College - Lancaster, CA
Computer Science
